Bijoy Saha

Frontend Developer (React)

Uttara, Dhaka, Bangladesh | bijoysahamernstackdev@gmail.com | linkedin.com/in/bijoysahadev | github.com/bijoysahadev

SUMMARY

Frontend developer who builds responsive web apps with React, JavaScript and modern CSS. Has built a multi-page e-commerce site and a social networking app with user login, real-time data and state management. Comfortable connecting a React frontend to REST APIs. Looking for a junior frontend or React developer role or internship.

SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+)
Frameworks and Libraries: React, Next.js, Bootstrap, Tailwind CSS, Redux Toolkit, React Router
Tools: Git, GitHub, Vite, Firebase, Axios, REST APIs, VS Code
Core: Responsive Web Design, Reusable Components, State Management, Form Validation, API Integration

PROJECTS

Exclusive - E-commerce Web App

React, Redux Toolkit, React Router, Tailwind CSS, Firebase, Axios | github.com/bijoysahadev/EComerce_Exclusive

- Built a 14-page online store including Home, Products, Product Details, Cart, Wishlist, Checkout, Account and Contact pages.
- Fetched product data from a REST API with Axios and added pagination to browse large product lists.
- Added user sign-up and login with Firebase Authentication, including email verification.
- Used Redux Toolkit for shared state such as breadcrumb navigation, and React Router for page routing.
- Created 20+ reusable components (cards, buttons, headings, containers) and product sliders with Swiper and React Slick.

LinkUp - Social Networking App

React, Redux Toolkit, Firebase Realtime Database, Tailwind CSS, Material UI | github.com/bijoysahadev/linkUp

- Built a social app where users can register, log in with email or Google, and set up a profile.
- Built friend requests, friend list, block list and group features using Firebase Realtime Database with live updates.
- Stored logged-in user data with Redux Toolkit so it is shared across pages.
- Added a sidebar, search bar, messaging, notifications and settings pages with toast alerts for user feedback.

Online Arot - E-commerce Admin Dashboard (in progress)

React, Ant Design, Tailwind CSS, Axios, Node.js, Express, MongoDB | github.com/bijoysahadev/online_Arot_dashboard

- Building an admin dashboard in React connected to a custom Express and MongoDB REST API.
- Built the registration form with Ant Design and Axios, showing clear success and error messages from the server.
- Wrote the matching backend sign-up route with email and password checks and secure password hashing using bcrypt.

EDUCATION

A Levels, Pearson Edexcel
Completed October 2025
